

## TMC 151- SILICON CORK

### INTENDED USE

Silicon cork is a truncated cylindrical or conical closure to seal a container, such as a bottle, tube or barrel. Unlike a lid, which encloses a container from the outside without displacing the inner volume, a cork is partially inserted inside the container to act as seal.

### PRODUCT FEATURE

- It is manufactured from pure silicone rubber.
- Autoclavable.
- Stoppers fit tightly to prevent chemical leaks.
- Size Number 8

### PACKAGING

Pack Size: 10 Nos

**NOTE:** Please consult the Material Safety Data Sheet for information regarding hazards and safe handling Practices.

**\*For Lab Use Only**
